

PERIMETER SAFEGUARDS

mamori wireguard vpn | connection policies

IMPROVE SECURITY REDUCE WORK

REMOTE ACCESS

Want to provide secure remote access to servers and databases without changing your network configuration?

Need a faster and more reliable VPN?

SECURITY CONTROLS

Want to reduce threat of data theft and ransomware with firewall rules, data limits and alerts?

Need a turn-key low cost VPN for privileged and 3rd party remote access?

COMPLIANCE & MONITORING

Need to meet fast approaching compliance *deadlines*?

THE MAMORI SOLUTION

Wireguard VPN & Connection Policies

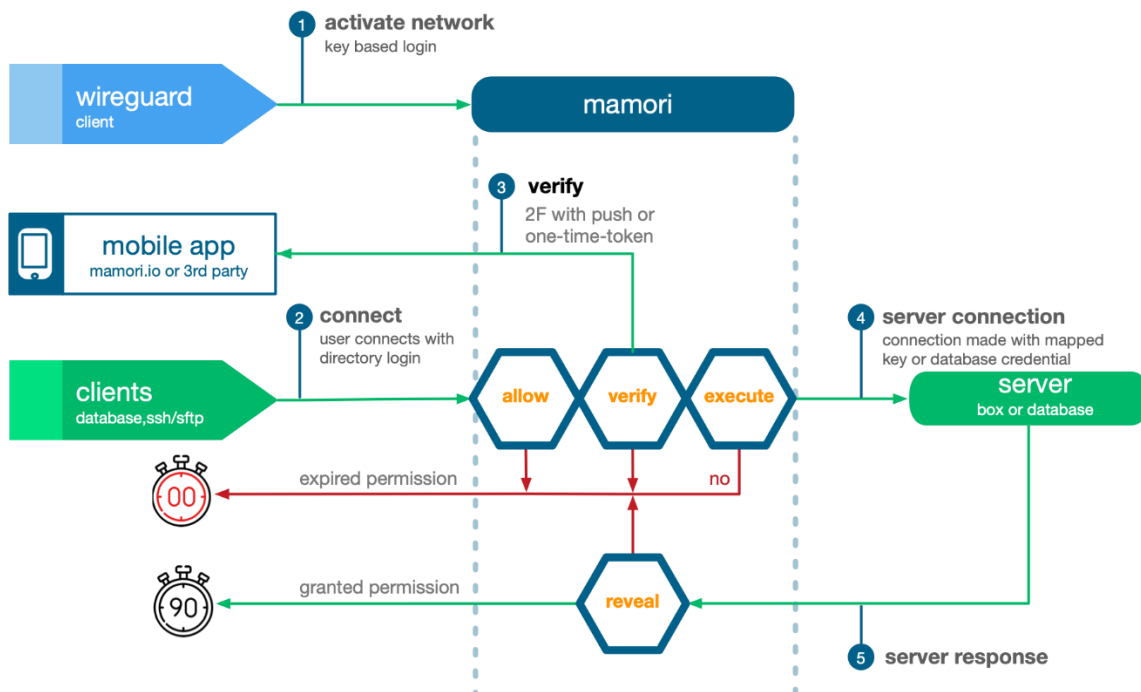

With mamori's built-in wireguard service you get a plug and play virtual private network (VPN) – no server-side configuration needed. Easily provide secure access for your users and service accounts to servers via wireguard endpoints. Further safeguard your perimeter with connection policies.

Wireguard VPN – Key Features

- 2x faster than OpenVPN and other legacy VPNs.
- Key based access. Password less
- Flexible network configurations : site to site, site to cloud, cloud to cloud, users to cloud and many more.

Connection Policies – Key Features

- Intuitive connection rule and alerts editor.
- Sent alerts via email, HTTP and mamori mobile notifications.
- Flexible actions: allow, deny, log
- Create rules over any property of the connection: IP, netmask, time of day, day of the week, client application name, target system, database type and more.

Key Benefits

Simple cloud or on premise installation. No changes to your servers, directories or client operations.

Built in multi-factored authentication.
(mobile push & one time passwords)

Control the allowed traffic to your servers and databases.

Out of the box monitoring and auditing of all access and SQL activity.
