

Mamori Server Release Notes

Version 3.5.093-098

Date: 6/August/2025

Key Features:

- Allow viewing for session recordings via an URI.
- Improve MongoDB Protocol support
- Support for DR Standby Databases
- Add kill session from connection log
- Improve Event Handler reporting abilities
- Improve support for multi-database Postgres servers

All Tickets:

Ticket No	Description	Type
8824	Ability to Kill Session and Kill Query from Grid	feature
9482	Update guac to the latest release	chore
9486	Update documentation to include letsencrypt	chore
9487	Improve Oracle SQL block parsing	feature
9500	PushTotp : Integrate with external TOTP provider secrets	feature
9501	Upgrade corrupting the Mongo DB JDBC driver	bug
9503	Create Datasource Disabled	feature
9504	View SQL Session - panel SQL start and end time not matching grid.	bug
9506	Edit Datasource - Change host allowing misconfiguration	bug
9507	Revoke of access to kill relevant user SSH, RDP, WEB or DB session(s)	feature
9513	Certify DB Client robo3T v1.4.4	feature
9514	RDP - permission UPLOAD/DOWNLOAD doesn't work as expect	bug
9518	Request Button Placement - sometime it is cut off.	feature
9521	Connection Log: SSH session Expandable Pane - duration session is wrong	bug
9522	Exclude 'mamori_internal' from permission views	feature
9523	On-Demand Policy: Change "owner" column label to "Last Modified By"	feature
9524	Launch session editor if URI contains ssid	feature
9525	user count in the user grid is wrong	bug
9531	Event Handlers: Improve ability to report on event handler alerts.	chore
9537	Event Handler: Allow HTML to be customized when calling the toHTML function of a resultset handle	feature
9543	RDP - COPY/PASTE Clipboard not working	bug
9547	Resource Requests : Execute approved request throwing exception	bug
9553	AUDIT LOG: Include user UPLOAD/DOWNLOAD actions in log	feature
9557	Disabled authentication providers should display differently	feature
9562	create pre-install check script	feature
9563	Add ability to press Ctrl-Alt-Delete to webRDP	feature
9571	Handle the case where the host machine does not have IPv6 enabled	bug
9606	Postgres Proxy: Allow DB clients to connect to databases other than the one defined in the datasource	Feature

9605	Web SSH File transfer window. Display human readable file sizes	Feature
9458	improve web SSH file transfer performance	feature
9505	if the hub is unable to resolve the hostname of the machine running the docker container things break in strange ways	feature
9516	Add WEBSQL option to not cache user SQL.	feature
9517	User Permissions. Allow user to revoke a permission from themselves.	feature
