

Mamori Server Release Notes

Version 3.6.2.0

Date: 8/March/2026

Key New Features and Enhancements

- New RDP user account authentication method –Use the current user’s credentials to connect to the target server.
- Added event handler to connection policies
- LDAP Enhancements – Sync now disables missing users.
- **Security Hardening:** Update NGINX headers to resolve vulnerability scan recommendations.

Key Bug Fixes

- SSH and RDP Session were timing out prematurely.

All Tickets:

TICKET NO	DESCRIPTION	TYPE
9307	AUDIT LOG - Log event handler	feature
9620	RDP - add "Use User's Login" to authentication method	feature
9733	Log stream solution	feature
9799	VDI - Host page not loading	bug
9800	Standardize Logging format	feature
9808	Google Analytics Cookie tags breaking VDI host load	bug
9819	[Support #97124] Web SQL - show Commit or Rollback output message whether transaction has been success commit or rollback	feature
9832	[Support #97144] - Users Grid - Total Count incorrect	bug
9869	Web Resource Launch - NPE	bug
9873	Replace `mamorisys.mamorialert`	feature
9888	HA Web Resource VDI Issues	bug
9937	LDAP sync: delay delete of missing users	feature
9940	Review access pipelines for vulnerabilities	feature
9944	Support #97131 LDAP search - handle users with expiration dates	bug
9948	Support #97172 - Implement User Password history Check	feature
9949	Enforce password change on first-time login	feature
9955	Approve Request : Remove the word "error" from message. Support #97153	feature
9968	Policy Ticket Number Regex hint: Add manual entry for user display . Support #97169	feature
9969	User Account Lockout Notification Pop-up - the time format display did not display as expected. Support #97173	feature
9970	Support #97171: Automatic password generation needs to adhered to complexity requirements	bug

9980	Problems with client IP in HA environment	bug
10001	Improve Azure error handling	bug
10004	Rename Policy - Not updating requestble items	bug
10010	Delete driver - deletes even if file no longer exists on disk.	feature
10011	NGINX Update for vulnerability scans	feature
